Students pursuing a doctoral degree in anthropology at the University of Washington focus on one of three subfields. Each of the three subfields has its own set of requirements.

- [Archaeology](https://anthropology.washington.edu/phd-anthropology-archaeology)
- [Biological Anthropology](https://anthropology.washington.edu/phd-anthropology-biocultural-anthropology)
- [Sociocultural Anthropology](https://anthropology.washington.edu/phd-anthropology-sociocultural-anthropology)

Graduate students in the PhD program may also add the following to their program of study:

- [specialization in medical anthropology and global health](https://anthropology.washington.edu/graduate-study-medical-anthropology-and-global-health)
- [statistics concentration](https://www.csss.washington.edu/academics/phd-tracks/anthropology)
- [graduate certificates in feminist studies, global health, public scholarship, and other areas](http://grad.uw.edu/admissions/find-a-program/graduate-certificate-programs/)

For information on applying to the anthropology PhD program, see [Graduate Admissions](https://anthropology.washington.edu/graduate-admissions).
